Steven Zhang

(740) 278-5741 | zhang.st3ven1@gmail.com | linkedin.com/in/steven-zhang8 | GitHub | Portfolio | Columbus, OH

Education

Georgia Institute of Technology — Atlanta, GA
M.S. Computer Science, Application Submitted — *Planned Start: Fall 2027*

The Ohio State University — Columbus, OH
B.S. Computer Science and Engineering, Minor in Mathematics; GPA: 3.7 — *April 2026*

Technical Skills

Languages: Python, Java, JavaScript (ES6+), SQL, C, Ruby, MATLAB
Frameworks: React 19, Angular 19, Spring Boot 3, Spring Security, FastAPI, Flask, SQLAlchemy, Pydantic, Chart.js
Cloud & DevOps: AWS (Bedrock, Lambda, DynamoDB, S3, CloudWatch), Terraform, Docker, GitHub Actions
Data & Tools: PostgreSQL, Redis, Supabase, Linux, Git, pytest, Testcontainers, Flyway, OpenTelemetry, MCP, Splunk

Projects

SentinelOps | Autonomous Incident Response Agent — github.com/BigMuscleSmoe/sentinelops
Personal Project (Python, Strands Agents SDK, Claude via Bedrock, Lambda, DynamoDB, Terraform, React 19)

- Automated the first 15 min of on-call triage with a **Bedrock AgentCore** agent that reads logs and opens a fix PR
- Cut projected cost by ∼$700/mo by backing the Knowledge Base with **S3 Vectors** over OpenSearch Serverless
- Reduced model spend by triaging alarms with **Amazon Nova Lite** first and escalating only hard cases to **Claude**
- Made every reasoning step auditable by streaming agent traces over **WebSockets** to a **React 19** UI
- Removed stored AWS credentials from CI by authenticating **GitHub Actions** through **OIDC** federation

RetireWise | Retirement Account Dashboard — github.com/BigMuscleSmoe/retirement-dashboard
Full-Stack Developer (Angular 19, Spring Boot 3, PostgreSQL, JWT, Docker) *Live Demo*

- Built a **Spring Boot** REST API with 10 endpoints for accounts, contributions, balance history, and projections
- Secured the API with stateless **JWT** access/refresh tokens, **BCrypt** hashing, and role-based access control
- Caught regressions early by running build, test, and SAST scans in **GitHub Actions** CI before every merge

FITT | AI-Powered Fitness & Nutrition Tracker — github.com/jmulyadi/FITT
Frontend Lead (React 18, Chart.js, FastAPI, Supabase, Groq)

- Shipped the full frontend for a 6-person team, writing ∼3,700 lines of **React** across logging and analytics views
- Built a conversational AI coaching chat with **Groq** that gives users personalized training and nutrition guidance
- Prevented integration rework by defining the REST API contract and wiring **ExerciseDB** into **FastAPI**

Experience

The Ohio State University — Columbus, OH
Teaching Assistant / Grader — *Jan 2025 – May 2026*

- Supported 100+ students in **Java** and object-oriented programming through office hours and live debugging help
- Kept grading consistent across the TA team by scoring assignments on shared rubrics with clear, actionable feedback

OSU Cyber Security Club — Columbus, OH
Member — *Aug 2024 – May 2026*

- Competed in Capture the Flag competitions, solving web exploitation, cryptography, and forensics challenges
- Ran vulnerability assessments and penetration tests on sample networks using **Nmap**, **Metasploit**, and **Wireshark**
- Collaborated with members on group projects to design and implement security protocols for simulated environments

Number 1 Chinese Restaurant — Steubenville, OH
Assistant Manager — *Jan 2022 – Dec 2022*

- Raised monthly sales by ∼$15,000 by negotiating a zero-commission DoorDash partnership and managing the portal
- Ran the Google Business profile and analyzed market trends and customer data to inform business decisions

Certifications & Languages

Certifications: Google Cybersecurity Professional (Coursera), Claude Corps (Anthropic)
In Progress: AWS Certified Cloud Practitioner, AWS Certified Solutions Architect – Associate
Spoken Languages: English, Mandarin (fluent)
