EDUCATION

Ohio State University, College of Engineering

Bachelor of Science in Computer Science and Engineering

Majors: Computer Science Engineering | **Minors:** Mathematics

Columbus, OH

April 2026

GPA: 3.650

WORK EXPERIENCE

Ohio State University

Teaching Assistant/Grader

Columbus, OH

January 2025 - Present

- Helped students during office hours with debugging, Java syntax, and understanding object-oriented programming
- Graded programming assignments and projects for over 100 students, making sure feedback was fair and on time
- Worked with other TAs to make sure grading was consistent and students got helpful feedback
- Answered student questions on discussion boards and over email to help them stay on track with their assignments
- Sat in on lectures to stay aligned with course content and better support students during office hours

Number 1 Chinese Restaurant

Assistant Manager

Steubenville, OH

January 2022 - December 2022

- Helped secure a partnership with DoorDash at a zero commission rate, resulting in an increase of \$15,000 in monthly sales
- Oversee the management of the restaurant's Google Business, DoorDash Merchant Portal, and email communications
- Analyze market trends and customer data to inform business decisions, manage inquiries, and ensure timely, satisfactory service
- Helped develop visual assets on Canva, such as logos and cover photos, to enhance the company's brand and online presence
- Negotiate contracts and terms with business partners such as DoorDash to increase sales and acquire new customers

PROJECTS AND INVOLVEMENT AND CERTIFICATION

Cyber Security Club

Member

Columbus, Ohio

August 2024 - Present

- Collaborated on group projects to develop and implement security protocols and solutions for simulated environments
- Competed in Capture the Flag (CTF) competitions, honing problem-solving skills and practical cybersecurity knowledge
- Conducted vulnerability assessments and penetration tests on sample networks to identify and mitigate security risks
- Developed proficiency in using cybersecurity tools such as Wireshark, Metasploit, and Nmap
- Networked with industry professionals to gain insights and career advice in the field of cybersecurity

Software/Personal Project

Personal Website

- Designed and launched a personal website using HTML, CSS, and JavaScript to showcase portfolio projects
- Implemented responsive design principles to ensure compatibility across various devices and screen sizes
- Integrated a blog section with an easy-to-use content management system (CMS) for regular updates

TCP/IP Client-Server List Manager

- Developed a client-server application in Python using TCP/IP sockets to manage dynamic list data
- Implemented JSON request/response handling for list operations (create, add, remove, show, delete, quit)
- Designed the client with validation, logging, and error detection for secure, reliable communication
- Built the server with persistent storage and response validation, improving fault tolerance and consistency across sessions

Certification

Google Cybersecurity Professional Certificate

- Gained hands-on experience with SIEM tools, incident response, and vulnerability management

CompTIA Security+ – In Progress (Target Exam: Sep 2025)

- Studying network security, risk management, and cryptography fundamentals

Technical Skills: Java, Microsoft Excel, MATLAB, C (Programming Language), Python, Assembly, SQL, Ruby

Tools: Git, React, Eclipse, Visual Studio, Linux, FastX, Putty, Rails, DataGrip, Tensorflow, Wireshark, Splunk

Languages: Fluent in Mandarin
