

Steven Zhang

(740) 278-5741 | zhang.st3ven1@gmail.com | linkedin.com/in/steven-zhang8
102 W Norwich Ave, Columbus, OH 43201

EDUCATION

Ohio State University, College of Engineering

Columbus, OH

B.S. in Computer Science and Engineering | Minor: Mathematics | GPA: 3.7

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), SQL, C, Ruby, Assembly, MATLAB

Frameworks & Libraries: React 18, Rails, Chart.js, react-chartjs-2, Vite, Supabase, TensorFlow

Tools & Platforms: Git/GitHub, Linux, Wireshark, Splunk, Metasploit, Nmap, Docker, VS Code, Eclipse, DataGrip

Other: Microsoft Excel, Canva | Fluent in Mandarin

PROJECTS

FITT — AI-Powered Fitness & Nutrition Tracker

Frontend Lead | 6-Person Team Project (React 18, Vite 5, Chart.js, Supabase)

March 2026

- Architected and built the complete frontend (~3,700 lines of React/JSX + CSS) for a mobile-first fitness web app featuring workout logging, nutrition tracking, recovery metrics, progress analytics, and an AI coaching chat
- Implemented 4 interactive Chart.js visualizations (activity trends, sleep quality, training volume, lift-specific progress) using react-chartjs-2
- Designed a custom dark-theme CSS design system (~980 lines) with responsive layouts, consistent color tokens, and smooth animations optimized for mobile viewports (420px base)
- Built a 90-second countdown rest timer with useRef intervals, exercise logging modals with add/remove functionality, and a nutrition logging UI with macronutrient breakdowns and daily calorie summaries
- Developed an AI chat interface with typing indicator animations and markdown rendering support for conversational coaching responses
- Integrated Supabase JWT authentication and structured the frontend for REST API consumption with the FastAPI/Python backend
- Collaborated via GitHub pull requests and branch-based workflow with backend, database, and AI/ML contributors

Retirement Account Dashboard — Full-Stack Java/Angular Web Application

In Progress

Personal Project (Java, Spring Boot, Angular, TypeScript, PostgreSQL, Docker, GitHub Actions)

- Building a secure full-stack web application that displays simulated 401(k) account balances, contribution history, and retirement income projections
- Designing a Spring Boot REST API in Java with JWT authentication, role-based access control, input validation, and OWASP-aligned secure coding practices
- Developing the Angular frontend with TypeScript, reactive forms, lazy-loaded modules, and Chart.js visualizations for balance and asset-allocation views
- Implementing PostgreSQL with Flyway migrations and SQL reporting queries; containerizing with Docker and running CI/CD via GitHub Actions with automated tests and SAST scans

Personal Portfolio Website: <https://personal-website-pearl-omega.vercel.app/>

HTML, CSS, JavaScript

- Designed and launched a responsive portfolio site to showcase projects, technical skills, and writing samples
- Implemented mobile-first responsive design principles ensuring compatibility across devices and screen sizes
- Integrated a blog section with a content management system for regular content updates

EXPERIENCE

Ohio State University

Columbus, OH

Teaching Assistant / Grader — Computer Science

Jan 2025 – Present

- Support 100+ students with debugging, Java syntax, and OOP concepts through office hours, discussion boards, and email
- Grade programming assignments and projects with consistent, timely feedback; coordinate standards with fellow TAs
- Lead weekly office hours and recitations, explaining complex technical concepts including recursion, data structures, and design patterns to students at varying skill levels
- Collaborate with course staff to refine rubrics and identify common student misconceptions, improving feedback quality across sections

Number 1 Chinese Restaurant

Steubenville, OH

Assistant Manager

Jan 2022 – Dec 2022

- Secured a zero-commission DoorDash partnership that increased monthly revenue by \$15,000
- Managed Google Business profile, DoorDash Merchant Portal, and communications; designed brand assets in Canva
- Trained and supervised front-of-house staff, handled customer escalations, and tracked daily sales to identify operational improvements

CERTIFICATIONS & INVOLVEMENT

- Google Cybersecurity Professional Certificate — Hands-on experience with SIEM tools, incident response, and vulnerability management
- CompTIA Security+ — In Progress (Target: Sep 2025) — Studying network security, risk management, and cryptography
- Cyber Security Club, Ohio State (Aug 2024 – Present) — CTF, vulnerability assessments, pentesting with Wireshark, Metasploit, Nmap
